June 10, 2016

Hello Professor Schwartz,

My name is Kimberly Walter I am the Member at Large of Panhellenic Executive Council for Fraternity & Sorority Life. Academics are a strong focus for our organizations and we wanted to take the time to share with you some words from a student (or students) who thought you particularly made an impact on her (or their) academic career.

“This professor's excitement about physics is truly contagious. He goes above and beyond to make sure students truly understand the material. Pr. Schwartz ignites fascinating conversations about the world and how it works on a daily basis. His class truly made me look at the world differently. I'm very grateful to have had him as a professor.” – Member of Sigma Kappa

On behalf of the Panhellenic community, we appreciate your commitment to education as you inspire the lives of students everyday.

Sincerely,

Kimberly Walter
