Hi everyone.

I just read through your **Cal Poly Course Evals** I've also posted them on our class website. Thanks for the feedback. Additionally, we have the feedback from our final presentations and potluck (see below). I've posted all this on our class website. In particular, while some celebrated the learning model, many students had difficulty with the lack of structure. I think it is difficult for students when you don't know your grade. I am going to start using PolyLearn to provide students some "grade security" from now on. I continued class discussion past the hour? Damn, I honestly thought that I very responsibly ended class on the hour, almost all the time. OK, something more for me to be mindful of. I apologize.

As I stated last week, I established a [webpage for our class projects](#). I would greatly appreciate it if you could please send me some kind of follow up, if only your PPT. I still have yet to receive something from the following four groups:

Solar Electricity, SunWork, and California Electricity (Eva, Avory, Danica, Denise, Juan)
Education (Maddy, Isabel, Nick, Christina)
Solarize Africa: Economics (Ben and Marc)
Recycling and why it's so lit! (Mallory, Mallory, Sean, Thomas)

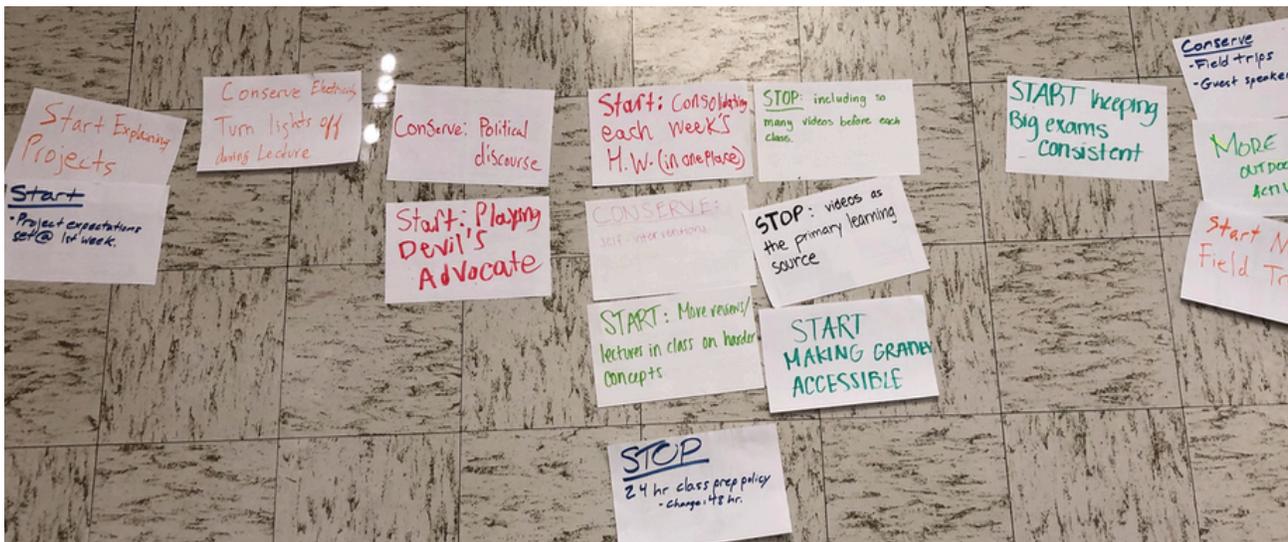

I'd greatly appreciate it if you could send me something.

I hope you're quarter has started out great.

Pete

Hi everyone,

Thanks for a wonderful potluck/extravaganza ending for PSC 320 with exquisite cuisine and presentations.

I am following up on some of our course improvements. I've established a [website for our projects](#). For future classes, I will present it before the first day of class, rather than after the final presentation.

I'm writing to ask you to please send me something to post for your group so that we have some idea of what you did. This was not on the syllabus, so it is not part of your grade. Hence, if you don't send me anything, I'll only be sad. However, it doesn't have to be a lot... you could just send me your final PPT presentation or poster. Additionally, it would be very nice if you could send a short summary and maybe a picture or two. For some groups, we made an agreement that you'd do some kind of follow up. In this case, please do that. Please see the website and let me know if there's anything I should change.

News about sustainability alumni society to follow.

Thanks and have a great weekend/break/life.
Pete
